» COMPREHENSIVE WATER SOLUTIONS FOR A GREENER TOMORROW

Since 2011, Greenhouse Aquatech has been at the forefront of sustainable water and environmental solutions across Central India. As one of the fastest-growing providers in this space, we deliver advanced, end-to-end systems for water treatment, process liquid purification and wastewater recycling - all tailored to meet global sustainability standards.

From large-scale infrastructure to grassroots rural projects, our expertise spans the full water lifecycle. We design and supply packaged, pre-engineered, and turnkey solutions that serve a wide spectrum of sectors, including power, healthcare, agriculture and urban development.

At Greenhouse Aquatech, we combine cutting-edge technology with deep environmental commitment, enabling industries and communities alike to access cleaner water, preserve resources and drive climate-conscious progress.

INNOVATION- DRIVEN WATER SOLUTIONS

Engineering a
Sustainable Tomorrow

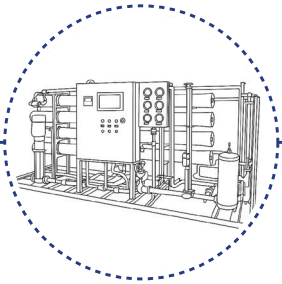

At Greenhouse Aquatech, we harness cutting-edge technology to create sustainable water and wastewater solutions for industries and communities across Central India. Our systems, ranging from modular units to large-scale recycling infrastructure, are designed for efficiency, adaptability and minimal ecological impact. From ready-to-deploy models to fully customised designs, we deliver practical, future-ready solutions that conserve resources and protect natural ecosystems. Backed by continuous innovation and collaboration, we are shaping the future of water sustainability with purpose and precision.

Integrated Water Solutions for a Sustainable Future From Source to Reuse - Smart, Efficient and Responsible

Wastewater Treatment Plants

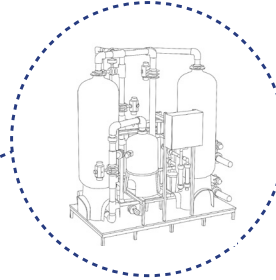

We specialize in closing the water loop with advanced wastewater treatment and recycling systems. Designed to meet stringent discharge and reuse standards, our solutions minimize environmental impact while maximizing water recovery.

SEWAGE TREATMENT PLANTS (STP)

Engineered to treat domestic and institutional wastewater with reliability and efficiency. Our STP solutions support water reuse, ensure environmental compliance, and reduce long-term operational costs.

EFFLUENT TREATMENT PLANTS (ETP)

Built for complex industrial effluents. Our ETP systems ensure safe discharge or reuse while meeting strict environmental and compliance standards.

Swift Engineering Support

We understand that time is critical. Our expert technicians provide on-site Support within 24 hours, minimising downtime, Ensuring compliance and protecting your Bottom line. Beyond rapid response, We offer continuous post-installation service to Maintain peak system performance through Regular calibration, troubleshooting and optimisation.

Integrated, End-to-End Solutions

Greenhouse Aquatech delivers seamless water management solutions under one roof. With in-house expertise across mechanical, electrical, and process engineering, we eliminate the need for multiple vendors. The result: cohesive, customised systems designed for reliability, efficiency and long-term success - from design to commissioning.

Global Insight, Local Excellence

Backed by decades of cross-industry experience, our team blends international best practices with deep regional insight. This unique balance allows us to offer cost-effective, high-performance solutions tailored to the specific environmental and industrial challenges of Central India, making world-class water treatment accessible where it matters most.

PARTNERSHIPS THAT POWER EXCELLENCE & INNOVATION

Exclusive Authorised Partner for Doshion in Chhattisgarh

As the exclusive authorised partner for Doshion in Chhattisgarh, Greenhouse Aquatech brings world-class water technology to the heart of Central India. This strategic alliance enhance our ability to deliver OEM-grade, precision-engineered solutions that blend Doshion's expertise in advanced treatment systems and automation excellence. Together, we set new standards in water management - driving innovation, reliability and performance across industries and infrastructure.
